

Accurate cut and fill calculations for contractor

For surveyors

Get fast, accurate ground measurements across your entire site as often as you need, safely and reliably.

Mapping an entire site in a short window of time is now a few clicks away with the WingtraOne. No need to stop machinery or walk in dangerous active areas. Instead you can create cut and fill reports in a matter of hours.

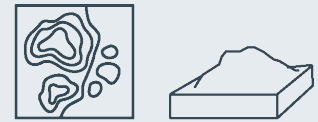

WingtraOne
+ RB61 payload
+ Base station

Photogrammetry processing

Analysis software

Generate contour lines and volumes

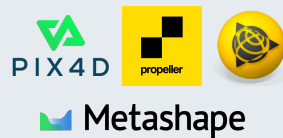

Import into CAD software

Compatible with

- Any kind of base station
- Any CORS network

Compatible with

Compatible with

Measure everything fast!

Map your entire construction site, and generate reports on the same day.

Cut risk and stay safe

Map with drones vs. exposing yourself to site hazards.

Easy difference calculations

Assess volume differences with simple workflows.

Export accurate volume reports

PPK data enables map overlay and precise analysis of volume differences
