

PIX4Dmatic TRAINING + MIGRATION

Move from PIX4Dmapper to PIX4Dmatic with confidence

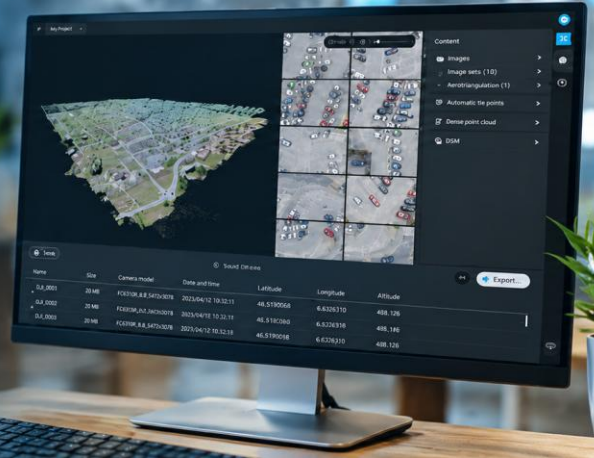

PIX4Dmatic

PIX4Dmatic Online Software Training

Master Drone Imagery Processing with Confidence

October 29th & 30th, 2026
8:00am to 12:00pm (PDT)

Move From PIX4Dmapper to PIX4Dmatic

PIX4Dmatic is the clear evolution of PIX4Dmapper — a modern photogrammetry workflow built for larger datasets, professional mapping, surveying and construction deliverables. With PIX4Dmapper sales and renewals ending **January 1, 2027**, now is the time to transition. PIX4Dmatic can open existing PIX4Dmapper projects, helping protect your previous work while moving to PIX4D's next-generation processing platform.

WHY MAKE THE MOVE?

- Built for Larger Projects** Efficiently process larger image datasets and demanding mapping projects.
- Modern Workflow** A streamlined interface makes it easier to move from images to accurate deliverables.
- Survey-Ready Tools** Work with RTK/PPK data, GCPs, checkpoints and coordinate systems.
- Keep Existing Projects** Open PIX4Dmapper projects directly in PIX4Dmatic.
- Prepare for What's Next** Move to PIX4D's current-generation desktop processing solution.

UPCOMING LIVE ONLINE TRAINING

Thursday, October 29, 2026
8:00 AM – 12:00 PM PDT

Friday, October 30, 2026
8:00 AM – 12:00 PM PDT

Live online • Instructor-led
\$340 per attendee
Certificate of Completion

PIX4Dmapper Transition Timeline

JAN 1, 2027

End-of-Sales

PIX4Dmapper will no longer be sold or renewed.

NOV 30, 2027

Final Support Access

Personal support and ticketing remain available through this date.

DEC 1, 2027

End-of-Support

Official support for PIX4Dmapper ends.

Training Topics Include

Importing 2D & 3D data • RTK/PPK & GCPs • Coordinate systems • Accuracy & quality control • Large datasets • Workflow integration

FREE 30-Day PIX4Dmatic License provided for training. Windows computer required.
